

Massachusetts Fire Training Council

Firefighter Practical Certification Examination

Skill Sheet No.	FF-I- 801	07-01-07	Candidate Number	
Skill Title: SELECTION AND USE OF PORTABLE EXTINGUISHERS				
NFPA Objective:	5.3.16	Minimum to pass	10	
PERFORMANCE:			P	F

	1.	Wears full protective clothing and utilizes positive pressure SCBA.				
	2.	Selects correct extinguisher given the size of the fire and the type of fuel burning.				
		• Ordinary Combustibles				
		• Flammable Liquids				
		• Flammable Gases				
		• Energized Electrical Equipment				
	3.	Carries extinguisher to a safe distance from fire.				
	4.	Pulls pin at top of extinguisher, if equipped, and breaks seal.				
	5.	Stands to the side of the extinguisher and charges by activating the cartridge, if equipped.				
	6.	Tests extinguisher to assure proper agent discharge flow is present.				
	7.	Shuts off electricity to the burning object, if applicable.				
	8.	Approaches fire from the upwind and uphill side, if possible.				
	9.	Begins discharging agent from a safe distance.				
	10.	Properly discharges the extinguishing agent based on the fire and fuel burning.				
	11.	Keeps carbon dioxide extinguisher on the ground while discharging agent, if applicable.				
	12.	Sweeps the extinguisher nozzle while discharging agent.				
	13.	Assures that the fire is extinguished.				
	14.	On class B or B/C <u>backs</u> away from the fuel source after fire is extinguished.				

Failure of this critical portion is cause for entire skill failure

Firefighter Practical Certification Examination

Skill Sheet No.	FF-I- 802	07-01-07	Candidate Number	
Skill Title: EXTINGUISH AN INTERIOR CLASS "A" MATERIALS FIRE-NOZZLE FIREFIGHTER				
NFPA Objective:	5.3.10	Minimum to pass		15
PERFORMANCE:				P F

1.	Wears full protective clothing and utilizes positive pressure SCBA.	2.	Activates PASS device.	3.	Sets nozzle for a 30-degree fog pattern with a minimum flow of 95 GPM.	4.	Slowly opens the nozzle fully, prior to entering the structure, to expel air and test the fog pattern.	5.	Feels door low to high, using the back of an ungloved or partially ungloved hand, prior to opening.	6.	Assures that the other two firefighters are ready to enter the structure.	7.	Stays low when entering structure displaying hostile/low visibility conditions.	8.	Advances hoseline to fire room while approaching from the unburned side.	9.	Keeps nozzle closed while advancing to fire unless necessary to operate for protection.	10.	Upon reaching fire, manages fire stream safely and properly based on the conditions present.	11.	Calls for first backup firefighter to ventilate structure, calls for second backup to start overhaul.	12.	Places nozzle outside of the building opening in preparation for hydraulic ventilation.	13.	Slowly opens the nozzle.	14.	Retracts the nozzle into the building approximately two (2) feet.	15.	Adjusts fog pattern to fill approximately the upper 85-90% of the opening with the stream slightly touching the sides of the opening.	16.	Holds stream steady until smoke has cleared or else is ordered back to the fire origin.	17.	Stops hydraulic ventilation by advancing the nozzle outside the building opening.	18.	Slowly closes the nozzle.	19.	Assures fire is overhauled and extinguished.	20.	Completes evolution using safe fire suppression skills.

Skill Title: EXTINGUISH AN INTERIOR CLASS "A" MATERIALS FIRE FIRST BACKUP				
NFPA Objective:	5.3.10 & 5.3.11	Minimum to pass	11	
PERFORMANCE:			P	F

	1.	Wears full protective clothing and utilizes positive pressure SCBA.				
	2.	Activates PASS device.				
	3.	Takes a position on the same side of the hoseline relative to nozzleman.				
	4.	Carries a forcible entry tool.				
	5.	Stays low when entering structure displaying hostile/low visibility conditions				
	6.	Remains behind nozzleman far enough to advance hose to him/her.				
	7.	Removes kinks in hoseline during advancement.				
	8.	Keeps hoseline opposite protruding corners to avoid kinking.				
	9.	Advances hoseline based on the need of the nozzle firefighter.				
	10.	Joins the nozzle firefighter after the hoseline is in position.				
	11.	Upon order from nozzle firefighter ventilates structure.				
	12.	Assists with overhaul of burning materials with a tool, not the hands.				
	13.	Orders nozzle firefighter back to origin to wet burning materials if necessary.				
	14.	Assures fire is overhauled and extinguished.				
	15.	Completes evolution using safe fire suppression skills.				

Failure of this critical portion is cause for entire skill failure

Skill Title: EXTINGUISH A DUMPSTER FIRE-NOZZLE FIREFIGHTER				
NFPA Objective:	5.3.8	Minimum to pass	11	
PERFORMANCE:			P	F

	1.	Wears full protective clothing and utilizes positive pressure SCBA.				
	2.	Sets nozzle for a straight stream pattern with a minimum flow of 95 GPM.				
	3.	Slowly opens the nozzle fully, prior to approaching dumpster, to expel air and test the stream pattern.				
	4.	Assures that the other two firefighters are ready to approach.				
	5.	Advances from uphill and upwind, if possible.				
	6.	Advances closed hoseline to approximately 100 feet from dumpster.				
	7.	Slowly opens the nozzle.				
	8.	Properly and safely manages fire stream to cool the dumpster and surrounding exposures.				
	9.	Extinguishes surrounding fires, if present.				
	10.	Orders first backup firefighter to open dumpster openings. (Top or sides)				
	11.	Extinguishes fire as exposed.				
	12.	Hydraulically overhauls material as much as possible limiting personnel exposure.				
	13.	Does not use excessive pressure during overhaul to avoid blowing and splattering material on personnel.				
	14.	Assures fire is overhauled and extinguished.
